

Gentle skincare for your baby's delicate skin!

With natural organic almond oil

All our care
Stellen App
for sensitive skin

0%
microplastics
mineral oils
Skin tolerance
dermatologically
approved

Gentler than ever.

From the first HiPP Babysanft product, we have always aimed to develop particularly gentle skincare products for sensitive baby skin.

That is why we avoid all undesirable ingredients, such as microplastics and mineral oils.

HiPP Babysanft is all about using top-quality ingredients that are highly nourishing, like our cold-pressed organic almond oil which is made from ripe organic almonds (from Italy and Spain). Organic almond oil is very mild, which is why it has been a staple in skincare routines for generations, especially to nourish dry skin.**

We don't just want the best for babies' skin but also for nature, which is why our products are more sustainable than ever.

** Ahmad Z: The use and properties of almond oil. Complementary Therapies in Clinical Practice 2010- ; 16: 10-12.

Formulations

Gentle and skin-compatible. We consequently avoid the use of mineral oils and microplastics in our HiPP Babysanft products.

Climate protection

Environmental conservation and climate protection are of utmost importance to us at HiPP. This is why we make sure that our production processes are resource-efficient.

Biodegradable formulas (ø99%)*

So that our products do not pollute our water and soil.

*Biodegradable – according to the OECD Guidelines 301/302 or comparable methods

Maximum recyclability

By switching to mono-materials for our packaging, we have increased recyclability to ø96%.

Product not tested on animals* & vegan**

Animal welfare is a matter of course for HiPP

*Animal testing for cosmetics is prohibited in the EU.

** Exception: Nappy Rash Cream & Lip Balm

We promise:

Our loving care for sensitive skin

- ✓ particularly careful selection of ingredients
- ✓ focus on product safety & skin tolerance
- ✓ resource-friendly products & production

For day-to-day life as a midwife or at the clinic:

Baby Oil – SENSITIVE

with organic almond oil

suitable from birth

particularly mild

nourishes, soothes and
protects sensitive skin

**It's highly versatile:
it can be used to replenish dry skin, to give a loving
massage or to gently cleanse the nappy area.**

Nappy Rash Cream – SENSITIVE

with organic almond oil

with zinc

free from fragrances

with panthenol

suitable from birth

Reduces slight redness & soothes baby's skin

Stephan HiPP
for sensitive skin

HiPP Mission: Climate protection

Environmental conservation and climate protection are of utmost importance to us at HiPP. This is why we make sure that our production processes are resource-efficient. Additionally, we try to make up for unavoidable greenhouse gas emissions through our involvement in global climate protection projects.

For more information, visit hipp.com

HiPP Mission: Sustainable packaging

- **Maximum recyclability:**
For used packaging to be made into something new.
- **More recycled packaging materials:**
Currently, we do not use recycled plastic for our packaging. We want to make sure that they contain no harmful substances that could harm our little ones. So far, we have not been able to find any recycled plastic that meets our quality standards. This is why we only use recycled materials if they do not have direct contact with our product – e.g. our folding boxes, cardboard trays or brochures.

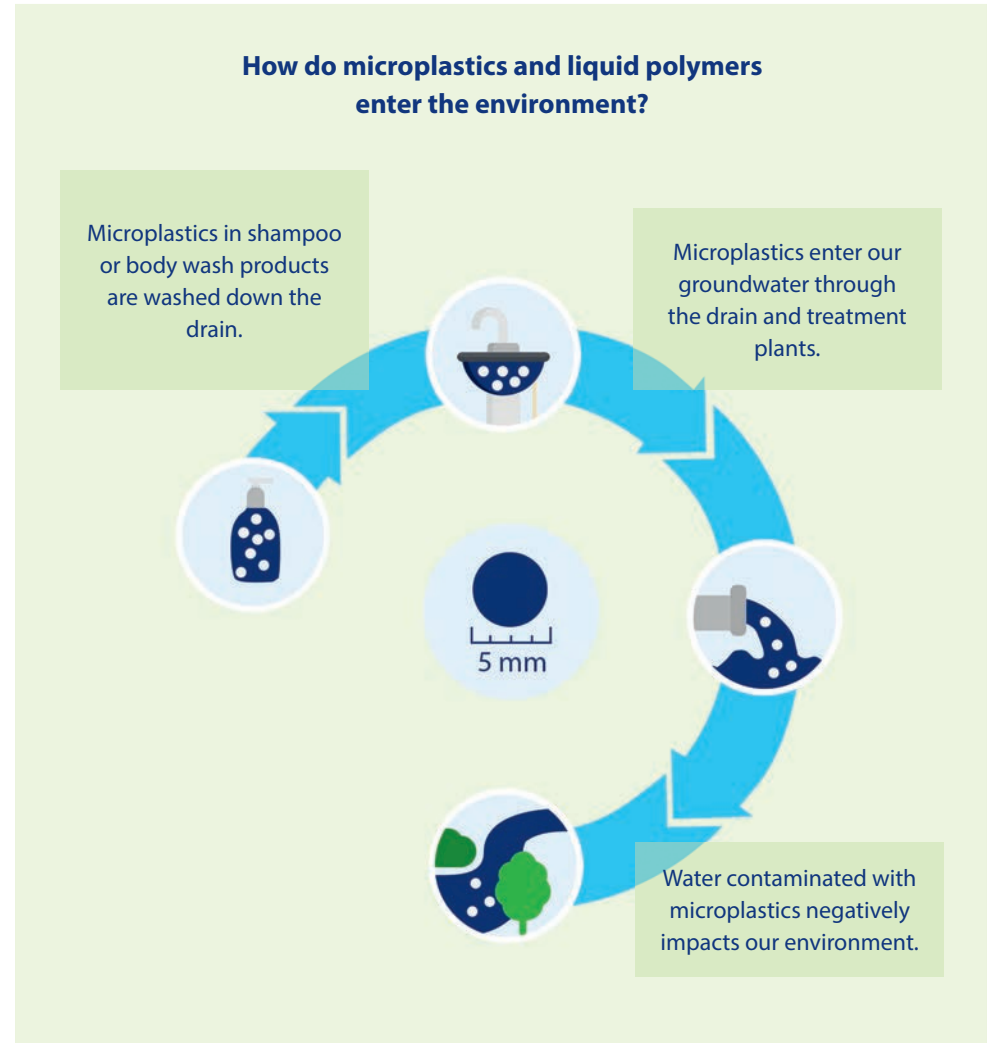

Gentle on the skin. Gentle on the environment.

HiPP Babysanft and Mamasanft products are free from microplastics and, thanks to improved formulations, also free from liquid polymers.

What exactly are microplastics and liquid polymers?

- **The term microplastics** refers to undissolved solid particles that are smaller than 5 millimetres. They are used in body scrubs and shower gels, for example.
- **Liquid polymers** are synthetically produced plastics and liquid constituents of products to give them a thicker consistency.

HiPP Babysanft – complete skincare range for babies of all ages

Free from undesirable ingredients – in accordance with Cosmetics Regulation
Biodegradable – according to the OECD Guidelines 301/302 or comparable methods
Product not tested on animals – animal testing for cosmetics is prohibited in the EU

By the way: Our basic skincare range* is also suitable for skin that is prone to neurodermatitis and is of course dermatologically approved!

*Head to Toe Baby Wash, Baby Shampoo, Baby Bath, Moisturising Cream, Ultra Moisturising Lotion

Prevention tips

“ABCDE” rule to protect baby’s bottom against inflammation

A

A ir:

Children not wearing nappies do not get nappy rash, which is why the nappy area should be aired as often as possible.

B

B arriers:

A barrier cream with zinc can help to protect the skin from urine and faeces and to regenerate the skin’s natural barrier function.

C

C leansing:

Make sure to do frequent nappy changes, including gentle cleansing and drying of the nappy area (gently patting it dry).

D

D iaper (nappies):

Use of highly absorbent nappies is preferable.

E

E ducation:

Informing the parents is crucial, as their knowledge dictates whether or not skin irritations can be avoided.

Source: Wollina U., Die Windeldermatitis –Teil 2: Prävention und Therapie. Päd 2006; 12: 1–4.

Specifically designed for convenient and hygienic use.

HiPP Mamasanft

Every woman's skin changes during pregnancy. Regular moisturising and massaging help the skin on the belly, hips and breasts get through pregnancy without any visible consequences. HiPP Mamasanft offers three products specially developed **for women's skincare routine during and after pregnancy:**

Massage Oil

Helps to effectively prevent stretch marks. The oil is also ideal for perineal massages (for external use only). To get the best results, we recommend daily massages.

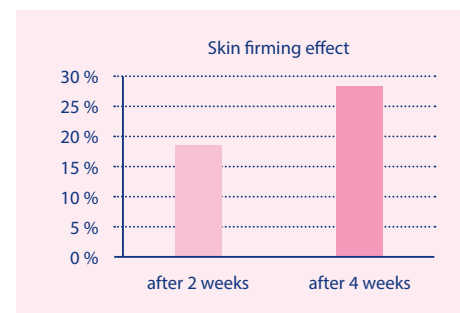

Body Butter

This rich cream provides stressed skin with lots of moisture both during and after pregnancy. Use for regular massages of the breasts, tummy and thighs.

For after childbirth: Firming Body Cream

This body cream with Regestril™ helps reduce stretch marks and supports the regeneration of connective tissue if used daily. It's free from caffeine and can therefore also be used while breastfeeding.

Its skin tightening effect has been proven in scientific studies!*

*Efficacy test of the active ingredient Regestril™ on 20 female testers
